

User Story:

As a freelancer, I need to organize my client contacts and project tasks in an easy web-based CRM

Task	Task Description	Est. Hours
1	Set up project repository and initialize Node.js backend	2
2	Design wireframes for client contact and task management interfaces	3
3	Implement frontend layout using HTML, CSS, Bootstrap, and Tailwind CSS	4
4	Create MongoDB schema for storing client contacts and tasks	3
5	Develop RESTful API endpoints for CRUD operations on contacts and tasks	4
6	Integrate frontend with backend API using JavaScript	4
7	Add reminder functionality with date/time picker and notification logic	3
8	Test all features for usability and fix bug	4
9	Write documentation for setup and usage	2
