Mini CRM System for Freelancers
Presented by: Srikar Boske
Course: SIT725 - Applied Software Engineering

Idea Overview

A simple web-based CRM tool tailored for freelancers to efficiently manage:

- Client contacts
- Project tasks
- Meeting minutes
- Reminders

Tech Stack

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS
- **Backend:** Node.js
- **Database:** MongoDB

Why It Matters

- Boosts productivity and communication
- Enables efficient task tracking and time management
- Reduces dependency on costly, complex CRM software
- Builds practical full-stack and database skills
